Natural History Articles in 1978

Edited by Richard L. Gulliver, Ph.D.

Compiled by Catherine Ferguson, B.Sc., Gillian Southwell, B.A., and Tom Brimelow, F.L.A.

School of Librarianship, Leeds Polytechnic.

The scope and purpose of these indices were outlined in the Spring issue of Natural Science in Schools. This index differs marginally in that there is more cross-referencing and a short biography section has been added. In 1978 the Ecologist changed its format, to the New Ecologist (bi-monthly) and the Ecologist Quarterly. For teachers with little knowledge of science or natural history Oasis (which in 1978 became quarterly) is especially relevant as it is very basic in its approach, and it attempts to present information in a form which is readable by middle school children. Back numbers are available (at 40p each plus 10p post and packing) from P.O. Box 237, London SE13 5QU.
